Meeting ID: 219 084 064 569
Passcode: Rwkjk6

June 3, 2026
1:00pm-2:42pm

I. CALL TO ORDER

This regular meeting of the Talkeetna Sewer & Water Board for Service Area No. 36 was held on Wednesday, June 3, 2026, at the Talkeetna Public Library at 24645 Talkeetna Spur Road in Talkeetna, Alaska and via Microsoft Teams. The meeting was called to order at 1:00pm by Drew Haag.

II. ROLL CALL

Talkeetna Sewer & Water Board members present and establishing a quorum were:

Mr. Andrew Haag – present and on-time
Ms. Jane Steere – present and on-time
Mr. Ryan Sheldon – present and on-time
Mr. James Kellard – present and on-time

III. APPROVAL OF AGENDA

Motion to adopt the agenda by Ryan Sheldon. Seconded by Jane Steere.

No objections, agenda approved as presented.

IV. APPROVAL OF MINUTES OF PRECEDING MEETINGS

A. Regular Meeting:

Minutes for the May 6, 2026, regular meeting were reviewed by the Board. Motion to approve the May minutes by Jane. Seconded by Ryan.

No objections, minutes approved as presented.

V. STAFF REPORT

A. TSW Supervisor (Amanda Fleming)

- The Annual Consumer Confidence Report will be mailed out to customers this month. The report summarizes our water quality results from 2025. Reports will also be sent to TCCI.
- Customer leak was repaired this week. Utility leak repaired helped but as we go into summer, production at the WTP is increasing. Operators continue to search for leaks.
- The WWTP came online on May 1st, and water quality results came back looking great. Start up was a bit tricky with the late ice.
- To date, our metered usage is greater than this time last year. This is a combination of customers running water this winter to prevent freeze ups and new customers added.
- Issues with the primary well pump again so town is on the fire pump only.

B. MSB Engineer (Mike Campfield)

- Working on the agreement for the CDS grant. An RFP will be issued for design when that grant gets accepted.
- Erosion issues – less than 100' from the Spur Rd on the southern part of the system. Working on solutions.

VI. AUDIENCE PARTICIPATION

- A. Drew addressed audience that during the Unfinished Business section primary communication be between the Board and the stakeholders. Members from the public can raise their hand if there are specific questions that come up.
- B. Jon Korta with TCCI – asked Mike C. if there is a trigger point for the MSB to take action for the erosion. Mike indicated the ROW line but that has yet to be determined. TSW operators are monitoring erosion but river levels have remained low so no significant changes have occurred since fall.

VII. UNFINISHED BUSINESS

- A. **Service Area Rule & Rate Changes** – topic referred to the July meeting.

B. Land Acquisition for New Headworks and Storage Tank Project – introduction of stakeholders.

- Tom Adams, MSB, Public Works Director
- Chad Fry, MSB, O&M Division Manager
- Amanda Fleming, MSB, TSW Supervisor
- Mike Campfield, MSB, Engineer
- Joe Metzger, MSB, Land & Resource Management Division Manager
- Megan Clemons, ARRC, External Affairs Director
- Christy Terry, ARRC, Vice President of Real Estate
- Kristen Gratrix, ARRC, Real Estate Contracts
- John Korta, TCCI, Chair
- John King, DNR, Natural Resource Specialist
- Hannah Uherkoch, DNR, Natural Resource Manager
- Rachel Longacre, DNR, Chief of Operations for Division of Mining, Land and Water
- Representative Kevin McCabe, District 30
- Senator George Rauscher, District O

Q: Can the SRF loan program be utilized if the property is not owned by the utility/MSB?

A: Via Drew w/ SRF Program – if the project design was for less time than the lease or permit then ownership was not required. *Clarifying questions could not be asked as a SRF program representative was not available.*

Q: Would ARRC sell land to the MSB for utility use? Would ARRC trade land to the MSB for utility use? Would ARRC permit land to the MSB for utility use and what would be the cost?

ARRC: ARRC is open to permitting this project but no formal permit application has been received. To determine the permit cost, either utilizing the tax assessed value or outside appraisal of the property to determine fair market value then the lease rate would be the standard 8%. Selling and trading is a much larger conversation (can take years) as lease/permit revenues help sustain ARRC operational and maintenance costs.

Q: Is lease to own an option?

ARRC: Nothing is out of the question, however any kind of conversation to that matter would need to start with a lease/permit application.

Q: Is the 8% the same for for-profit entities?

ARRC: Yes.

Q: What is the ARRC's mission statement?

ARRC: In brief, it boils down to safety, service and profitability. ARRC should deliver safe, efficient, and reliable rail transportation services as well as real estate services for Alaskan businesses and communities to support economic development. This is all done outside of the State budget – the main factor in why real estate assets are essential to help sustain

operations.

Q: Do you know the percentage of revenue that Talkeetna bring to ARRC (real estate, commerce, tourism)?

ARRC: Talkeetna is an important destination for ARRC, but numbers are not readily available for this meeting.

Q: There has been discussion that permitting this facility was contingent on the MSB taking over maintenance responsibilities for the pedestrian bridge over the Talkeetna River. Is this true?

ARRC/MSB: While there was conversation with the MSB several years ago about maintenance responsibilities, the two projects were/are separate.

Q: Will ARRC subdivide properties?

ARRC: Permitting would only be applicable for the acreage necessary – not the whole parcel.

Q: Is there room to add a storage tank on the existing property off C Street?

ARRC: There has been no formal application for this property so until there is an application that triggers the ARRC internal review process (engineering, maintenance, ROW), there is no definitive answer.

Q: Would ARRC be opposed to doing a shallow test well at the current site on C St?

ARRC/MSB: MSB has not asked to drill a test well at the current site, but it would require an application. Ultimately, the MSB would prefer to own the site of the future infrastructure and while the MSB is still engaged in conversations with ARRC about this project, the MSB has focused on looking at several sites in and outside the Service Area that could be owned by the MSB. Ownership is not MSB mandate but preference and keeps options open for future funding opportunities including from the SRF program.

Q: Is there an update on the land acquisition application with DNR?

DNR: The preliminary decision was distributed for public notice for a minimum of 30 days. Public comment closed Wednesday, May 27th. Comments have been collected and the next step is to summarize the comments, respond to the comments, and issue a final finding and decision. There is no timeline for the final finding and decision.

Q: The preliminary decision states that the decision to convey the property to the MSB can be rescinded if the land is not used for the purpose defined in the application, is this correct? Does it have to be for a water/wastewater utility?

DNR: Yes. The State could take the land back from the MSB if it is not used for public and charitable purposes. Typically, the application just defaults to public and charitable purposes and not the project specifically but that likely would be another discussion if that occurred.

Q: Who initiates the application process with ARRC? How long does it take?

MSB: The MSB via the Public Works Department would initiate the application. An application would open the door to more conversations.

Q: Are the 5 or 6 sites from the HDR study a firm no or is there potential to utilize any of them?

MSB: Yes, they are all a no. Either the entities didn't want to sell the land, be burdened by the facility on their property, land contaminations, outside the service area, etc.

Q: Is 95 years a negotiable term for a permit?

ARRC: Yes. The current permit is for 40 years but longer terms could be considered.

Q: How long is the current SRF loan term?

MSB: 20 years.

Q: Do you know what the design longevity of this upgrade project would be?

MSB: Anticipated to be 50 years. However, in terms of whether land ownership vs. permit terms would satisfy the SRF program requirements, that is still to be determined as the communications between the MSB and SRF program suggest land ownership is necessary.

Q: Is there a different application to purchase ARRC land? What would the process be to ask the question?

ARRC: Land sale requires board approval. Per statute, it's a multi-step process. One of those requirements is that the property be sold at fair market value, which is an expense to the MSB. There is no formal process however, it's never ARRC's first option. This process also requires legislative action.

Q: What does the permit process look like? Does it need to be engineered? Ground tested and surveyed? What is the fee?

ARRC: Depends on the kind of permit but from what we already know of the project plus the working relationship with the MSB, it would be a one-page document with a scope of work that could be one paragraph to several pages. It does not need to be fully engineered. As for ground tests and surveying, it all depends. Fee is \$500.

Q: What does land purchase from ARRC look like?

Rep. McCabe/ARRC: In reference to the current Nenana and Whittier land purchases, it requires a bill. A representative would submit the bill which goes through committee, gains support, and gets voted on both in the House and Senate. Once passed, the governor signs it. After that, ARRC is authorized to negotiate. The bill is very specific to the negotiating terms. There is no formal process however, negotiations between ARRC and the community/local government typically spans years.

Q: Is land trade with ARRC an option?

ARRC: It is an option. For example, in the Whittier legislation it specifies that fair market value could be provided in cash or equal value land. The land would have to meet ARRC's leasing needs and require board approval.

Q: Is the groundwater contaminated property the 2.3 acres owned by David Tisch?

MSB/TSWB: Possibly, but MSB Land Management did extensive property search within the service area. The property is listed for over \$500,000 so there is a significant cost to purchasing the land.

Motion to apply for an ARRC land use permit at the test well site to keep all options on the table while the DNR process continues made by Ryan. Seconded by Jane.

Confirmation from ARRC that the application does not commit the MSB to a lease but would allow the internal ARRC process to go through proper review to determine costs.

From ARRC, the current permit that expires in 2028 is a blanket utility permit from the 1980s that has underground and the wellhouse included. The wellhouse should not be included in that permit. Regardless of current use, any expansion would require a new permit application, not renewal. The current permit would be split into two permits, one with underground and one with the current wellhouse. The current site, when decommissioned, would be terminated. The new well site would be a separate permit.

From DNR, a permit application with ARRC will not interfere with the DNR decision process.

No objections, the motion passes as presented.

Tom Adams confirmed an application would be submitted with board request. Ryan will send a letter to Public Works.

Q: How many wells are at the current site? Can one of the current wells be used as a test well? Would the future site need two wells.

MSB: There are two wells. One is the primary and the other is the backup/fire pump. Both wells source the same aquifer and would be difficult to reliably test. Design of the future site has not started so determination of one or two wells is still TBD.

Q: The DNR parcels are between two parcels with private septic systems and 200' separation. Is there room for a well?

MSB: The parcels are 400' total, so there is room to have a 200' radius.

Q: Now that public comment is closed, what is the next step?

DNR: A Final Finding and Decision will be made. Then there is the opportunity to request for reconsideration. This can be made by anyone who made a comment during public comment. Timeline will be specified in the FFD but typically either 20 or 30 days. There is a fee.

Q: Is the only reason to move the wellhouse to get away from Arsenic?

MSB: That's not the only reason but one of the top reasons. Other reasons include rehabilitation costs of the current site as well as difficulty rehabbing while in operation, and fire department access is difficult to the current site.

Q: Do the permit fees get adjusted with inflation?

ARRC: Yes, there are several ways to do this. Appraisal adjustment, 3% increases, etc.

VIII. NEW BUSINESS

A. None.

IX. COMMENTS FROM THE BOARD

A. Ryan – appreciate everyone for making the effort to attend, we'll get to the bottom of this. Everyone is going to have an issue of it somewhere so hopefully we can find a site because this project is needed.

Drew – thank you everyone, great turnout. Thanks for the clarification and hopefully we move forward and work together.

Jane – thank you for the information and listening to us.

X. NEXT MEETING

A. Regular Meeting: July 1, 2026, 1:00pm, Talkeetna Warm Storage & Teams

- Motion to move the next meeting to the Talkeetna Public Library by Ryan. Seconded by Jane.

No objections, motion unanimously approved.

XI. ADJOURNMENT

Motion to adjourn Ryan. Seconded by Jane.

No objections, meeting adjourned at 2:42 pm.

Mr. Andrew Haag, Chair

ATTESTED:

Ms. Amanda Fleming, Board Administrative Support

Wastewater Treatment – June water quality results came back great. The lagoons were pumped down for operators to shut off the treatment plant for the month of July.

Water Treatment – The annual Consumer Confidence Reports were mailed out to customers, posted around town, emailed to TCCI and Chamber, and is available online. This report summarizes our 2025 water quality results.

During July, operators will collect disinfection by-product samples throughout the distribution system and recently, operators collected special purpose, non-compliance PFAS samples for ADEC. This is the third set of samples collected; the first two sets did not identify PFAS in our wells.

Alaska Rural Water Association is here this week performing a sanitary survey of our well house and treatment plant. The survey is performed every three years to assess and identify any sanitary concerns within the treatment process. As identified in previous surveys, the hydropneumatic pressure tank is of significant concern given age, exterior tank condition, and lack of ability to inspect the interior of the tank. The condition of the tank is one of the many reasons the Utility/MSB has identified the new wellhead and storage tank project as the primary project for TSW.

Operators – Mike Foster is scheduled for a training next week in Fairbanks. At the end of the week, he will test for his level 1 water treatment exam. Assuming he will pass, he will then be provisionally certified in all four TSW systems.

Lift Stations – Lift station 2 (airport lift station) generator is now wired in with an automatic transfer switch. The only facility not on an ATS is lift station 1 (Latitude lift station) which is not scheduled to have a permanent backup generator stationed on-site due to low demand.

Lift station 3 (G St lift station) will have power and communications switched from overhead to underground in the next couple weeks. This will eliminate concern of roof slides and equipment damaging the lines that currently extend to the roof of the building.

STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINING, LAND AND WATER

FINAL FINDING AND DECISION

of a
Noncompetitive Public and Charitable Conveyance – ADL 234738
AS 38.05.035(e), AS 38.05.810(a)(1)

and its
RELATED ACTION
Mineral Order 1335 (Closing) - AS 38.05.185 and AS 38.05.300

This Final Finding and Decision (FFD) complements and updates the Preliminary Decision (PD) dated April 23, 2026. The PD (attached) and related action have received the required public review.

I. Recommended Actions

The State of Alaska (State), Department of Natural Resources (DNR), Division of Mining, Land and Water (DMLW), Land Conveyance Section (LCS) recommends conveying 1.42 acres, more or less, of State-owned land as described in the attached PD, pursuant to Alaska Statute (AS) 38.05.810(a)(1) Public and Charitable Use, to the Matanuska-Susitna Borough (MSB). DNR will include a reversionary clause in the patent for the subject parcel pursuant to AS 38.05.810(g). The parcel is located within the DNR's Southcentral Region, in Talkeetna, and surveyed as U.S. Survey No. 1260, Talkeetna Townsite, according to the plat approved by the United States Department of the Interior, General Land Office in Washington D.C., on August 22, 1919, containing 1.42 acres, more or less.

There is one related action with this proposal:

Mineral Order: DNR proposes to close the subject parcel to new mineral entry through Mineral Order (MO) 1335.

Public notice for this related action was conducted concurrently with the notice for the primary action's PD.

II. Authority

DNR has the authority under AS 38.05.810(a)(1) Public and Charitable Use, to sell or dispose of state land to a state or federal agency or political subdivision for less than the appraised value as determined by the director and approved by the commissioner to be fair and proper and in the best interests of the public, with due consideration given to the nature of the public service or function rendered by the applicant, and of the terms of the grant under which the land was acquired by the State. AS 38.05.810(a) Public and Charitable Use states, "The commissioner shall ensure, by regulation, deed restriction, covenant, or otherwise, that disposals of land under this subsection serve a public purpose and are in the public interest."

AS 38.05.810(g) states, "The commissioner shall retain a reversionary interest on each sale or other disposal granted under (a) or (e) of this section. The commissioner may waive the reversionary interest on a written determination that the waiver is in the public interest."

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 2 of 10

AS 38.05.035(e) Powers and Duties of the Director gives DNR the authority to sell state land if, on preparation and issuance of a written finding, it is determined to be in the best interest of the state. *Article VIII, Section 1*, of the Alaska Constitution states, “It is the policy of the state to encourage settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest.”

For the related action, AS 38.05.300 Classification of Land and AS 38.05.185 Generally allow for mineral orders.

III. Public Participation and Input

Pursuant to AS 38.05.945 Notice, public notice inviting comment on the PD for the proposed primary action and draft of the related action were published and distributed in the following manner:

- Posted under State of Alaska Online Public Notice from April 23, 2026 to May 27, 2026, per AS 38.05.945(b)(3).
- Posted on DNR Land Sales website from April 23, 2026 to May 27, 2026.
- Mailed, with a request to post for 30 days to the Talkeetna Post Office and Talkeetna Public Library per AS 38.05.945(b)(3)(C).
- Emailed Alaska Soil and Water Conservation District and Upper Susitna Soil and Water Conservation District per 11 AAC 67.029 and AS 41.10.130(a).
- Mailed to Cook Inlet Regional, Inc. and Gold Creek-Susitna Native Association, Inc. per AS 38.05.945(c)(2)-(3).
- Emailed to the Matanuska-Susitna Borough manager, Talkeetna Sewer and Water, and Talkeetna Community Council per AS 38.05.945(c)(1).
- Emailed and mailed to the Matanuska Electric Association, holder of the easement within the subject parcel.
- Emailed to Alaska Miners Association and Trustees for Alaska.
- Emailed all members of the Alaska Legislature.
- Emailed DNR DMLW Managers, Agency Review commenters, and the applicant.
- Mailed notification to 207 landowners within a half-mile radius of the parcel per AS 38.05.945(b)(3)(D) or (E).

The public notice stated that written comments were to be received by 4:30 PM, May 27, 2026, in order to ensure consideration and eligibility to appeal. For more information, refer to the attached PD.

IV. Comments Received

DNR DMLW LCS received comments from 18 members of the public during the public comment period. All comments received during the public comment period have been consolidated into 13 topics and are summarized and addressed below.

Public Comment #1: The woods that currently exist on the subject parcel are a vital source for wildlife and should not be removed.

DNR DMLW LCS Response: LCS appreciates your review of the proposal. The conveyance application documents were distributed to State agencies for review from January 23, 2026, to February 24, 2026. The intent of the agency review was to request

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 3 of 10

comments from agencies that may be affected by a conveyance decision. Agencies were given the opportunity to evaluate and comment on the MSB's land request to determine if the State should retain all or a portion of the subject lands, and if so, provide supporting reasons for the requested action. The Alaska Department of Fish and Game (ADF&G) was included in this agency review, and did not object to the land disposal. ADF&G's agency review comment stated that development of the area would slightly reduce habitat for local species, but would be unlikely to have a population level impact on wildlife. It was suggested that conserving habitat features like trees, shrubs, and ground cover can help support breeding bird populations while meeting project goals.

The MSB's proposed design for the public drinking water facility may allow for the presence of trees, shrubs, and ground cover, however, the scope of the decision to convey the subject parcel does not include the control of the post-patent use, and LCS does not intend to impose deed restrictions for this purpose. LCS recommends that members of the public engage with the MSB during the public drinking water facility design process.

Public Comment #2: The commenter stated that conveyance of the subject parcel is not in the state's best interest.

DNR DMLW LCS Response: LCS appreciates your review of the proposal. This FFD recommends proceeding with the action as described in the Preliminary Decision. It is in the best interest of the State of Alaska to convey the land to the MSB subject to the reservations, exceptions, and restrictions, as stated in the PD and this FFD.

Public Comment #3: The commenter stated that they have no opposition to the MSB acquiring the subject parcel if they intend to keep them in the current condition.

DNR DMLW LCS Response: LCS appreciates your review of the proposal. DNR has the authority under AS 38.05.810(a)(1) Public and Charitable Use, to sell or dispose of state land to a state or federal agency or political subdivision for less than the appraised value as determined by the director and approved by the commissioner to be fair and proper and in the best interests of the public, with due consideration given to the nature of the public service or function rendered by the applicant, and of the terms of the grant under which the land was acquired by the State.

Pursuant to AS 38.05.810, the applicant must require the land for a project that provides a public service or function rendered by the applicant. Additionally, DNR's Susitna-Matanuska Area Plan covering the subject parcel specifies that the subject parcel should remain in state ownership unless required for public purposes. This FFD is written in response to an application submitted by the MSB to acquire the subject parcel for a project that will result in a new public drinking water facility. The MSB does not intend to keep the subject parcel in its current condition. Conveyance to the MSB would be unlikely if the application did not specify a public purpose to be provided with the land.

Public Comment #4: The commenter stated that the PD did not acknowledge the formal letter they submitted to LCS expressing their interest in purchasing one or both of the subject parcel for the purpose of placing the land into private ownership as a park or preservation area. The commenter expressed concern about the completeness and transparency of the conveyance process because of this.

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 4 of 10

DNR DMLW LCS Response: On January 16, 2026, LCS staff received an email from the commenter that expressed interest in acquiring the subject parcel. On January 20, 2026, LCS staff responded to state:

- LCS had previously received an application from the MSB to acquire the land to develop a public drinking water facility on the parcel;
- The DNR area plan used to guide decisions states that both lots are to be retained in state ownership unless required for a public purpose; and
- Several programs exist to allow state land to be conveyed non-competitively, but LCS was unable to determine any statutes or programs that would allow the commenter to qualify for a conveyance. A fact sheet was provided, and LCS staff asked the commenter to identify any conveyance statutes they believed they qualified for. The commenter did not respond to that request.

In the absence of an application or mechanism to convey to the commenter, the 1/16/26 letter was not mentioned in the PD. The scope of the decision was limited to (1) if the applicant (MSB) and subject parcel themselves qualify for a Public and Charitable conveyance, (2) if it is in the State's best interest to convey the subject parcel, (3) if it is in the State's best interest to convey the subject parcel to the applicant (MSB), and (4) if it is in the state's best interest to waive the reversionary clause. However, the public comment period allowed the public an opportunity to submit written comments on the proposal and provide information on current or traditional uses. LCS appreciates the review of the proposal and the additional information about the current uses of subject parcel.

Public Comment #5: The subject parcel contains a walking trail that is referred to as the "Bear Trail". The trail is used by local residents and tourists to access downtown, the boat launch, and campground areas. The subject parcel is valuable in its current state for the trail.

DNR DMLW LCS Response: LCS appreciates your review of the proposal. The existing walking route is an unofficial trail qualifying as a Generally Allowed Use of state land pursuant to 11 AAC 96.020 Generally Allowed Uses. Creating generally allowed use access improvements such as brushing or cutting a trail less than five feet wide using only hand-held tools such as a chainsaw does not create a property right or interest in the trail.

The scope of this decision to convey the subject parcel does not include the control of the post-patent use, and LCS does not intend to impose deed restrictions for this purpose. Management authority of the subject parcel remains with the state until the proposed conveyance is completed. Once title to the land is transferred, the MSB will be authorized to control access to the subject parcel based on public safety considerations and necessary setbacks from the public drinking water facility, if any.

Public Comment #6: The public notice document distributed to the public was insufficient and does not detail the proposed action. DNR did the minimum to notice the public and the public comment period should be longer.

DNR DMLW LCS Response: Pursuant to AS 38.05.945, LCS distributed the PD, vicinity map, public notice, and draft mineral order for public review and comment. The public

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 5 of 10

notice document contained information about the proposed action and the location of the subject parcel. Additionally, the public notice document provided instructions for how to submit a comment, the comment deadlines, and directed recipients to two websites containing the decision documents. Lastly, the public notice document described the action's next steps following public notice.

Notice for the proposed conveyance was posted on the Alaska Online Public Notice System for 34 consecutive days which exceeds the 30-day requirement. The notice was also posted on the DNR DMLW Land Sales public notice web page and the Alaska Division of Mining, Land and Water's Facebook page. For information on how notice was provided, see section III. **Public Participation and Input.**

Given the 34-day public notice period and multiple notice methods used, LCS's public notice of the project was sufficient and exceeded statutory requirements. All timely comments received during the public notice period have been considered in this FFD.

Two comments addressed concerns regarding archaeological and historic sites within or near the subject parcel:

Public Comment #7: The subject parcel and nearby area may contain known and/or undiscovered native burial sites and cultural resources such as house remains and trash middens. Grave sites are protected by the Native American Graves Protection and Repatriation Act (NAGPRA). The commenter asked if DNR will require compliance with this act.

DNR DMLW LCS Response: The conveyance application documents were distributed to State agencies for review from January 23, 2026, to February 24, 2026. The intent of the agency review was to request comments from agencies that may be affected by a conveyance decision. Agencies were given the opportunity to evaluate and comment on the MSB's land request to determine if the State should retain all or a portion of the subject lands, and if so, provide supporting reasons for the requested action. The Alaska Department of Natural Resources, Division of Parks and Outdoor Recreation, Office of History and Archaeology (OHA) was included in this agency review. OHA is Alaska's primary office with knowledge and expertise in historic preservation dedicated to preserving and interpreting Alaska's past and serves as Alaska's State Historic Preservation Office (SHPO) pursuant to the National Historic Preservation Act of 1966. LCS also consulted with OHA outside of the agency review period. OHA's records indicate one cultural resource site near the subject parcel, and no previously identified cultural resource sites within the subject parcel.

The scope of this decision does not include the control of post-patent use, and LCS does not intend to impose deed restrictions for this purpose. Similar to any other entity, the MSB must remain in compliance with all applicable federal, state, and local ordinances and regulations, including NAGPRA, when constructing and operating the public drinking water facility.

Public Comment #8: As a cautionary approach, a comprehensive cultural resource assessment should be conducted before development of the public drinking water facility.

DNR DMLW LCS Response: The subject parcel is located within the Matanuska-Susitna Borough; therefore, a traditional use finding is not required per AS 38.05.830 Land

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 6 of 10

Disposal in the Unorganized Borough. The scope of this decision does not include the control of post-patent use, and LCS does not intend to impose deed restrictions for this purpose. Upon conveyance, responsibility for response to any cultural resources discovered during construction and operation of the public drinking water facility will be transferred to the MSB.

Five comments addressed concerns regarding the proposed use of the subject parcel post-patent:

Public Comment #9: The noise and visibility of the public drinking water system would negatively affect adjacent landowners, neighbors, and tourism in Talkeetna.

DNR DMLW LCS Response: Pursuant to AS 38.05.810, the applicant must require the land for a project that provides a public service or function rendered by the applicant. However, the scope of this decision does not include the control of post-patent use, and LCS does not intend to impose deed restrictions for this purpose. LCS recommends that members of the public engage with the MSB during the public drinking water facility design process to address concerns about the appearance of the facility.

Public Comment #10: Alternative sites for the public drinking water facility were not researched. Additional research should be done, or the water facility should remain at the current site.

DNR DMLW LCS Response: On July 18, 2025, LCS received a complete application from the MSB requesting conveyance of the subject parcel under AS 38.05.810(a)(1) Public and Charitable Use. This FFD is being issued in response to that application. See section **IV. Scope of the Proposal** of the PD for the scope of the decision. Site selection for a new public drinking water facility or research on alternative sites, including other state-owned land, is not within the scope of this decision and is a municipal planning responsibility.

Public Comment #11: Use of the subject parcel for the public drinking water facility is not consistent with the Talkeetna Sewer and Water Advisory Board (TSWAB) Resolution No. 26-01.

DNR DMLW LCS Response: This FFD is being issued in response to the Public and Charitable conveyance application that LCS received on July 18, 2025. See section **IV. Scope of the Proposal** of the PD for the scope of the decision. The MSB applied for conveyance and is the entity funding and planning the public drinking water facility project. The TSWAB is an advisory board between the community of Talkeetna and the MSB. The TSWAB Resolution No. 26-01 adopted on April 1, 2026, is directed to the MSB. The MSB is the applicant responsible for funding and planning the public drinking water facility and for addressing advisory input from TSWAB during project development.

Public Comment #12: The subject parcel is in a floodplain with long-term environmental suitability, floodplain compliance, and risk exposure issues. Flooding can cause arsenic in the water table to migrate.

DNR DMLW LCS Response: As stated in the PD, this parcel is in Zone AE as determined by the FEMA Flood Insurance Rate Map panel 2803E, effective March 17, 2011. Zone AE indicates that base flood elevations have been determined and the parcel is subject to inundation by the 1% annual chance flood. The subject parcel is also

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 7 of 10

included within the 100-year Flood Zone on the MSB flood maps. The MSB has received this information with the PD.

The MSB has applied for conveyance of the subject parcel for public and charitable use and will be responsible for the design and operation of the public drinking water facility. The scope of this decision does not include the control of post-patent use, and LCS does not intend to impose deed restrictions for this purpose.

Public Comment #13: The proposed conveyance should be paused.

DNR DMLW LCS Response: This decision recommends proceeding with the conveyance action as described in the Preliminary Decision. Prior to transferring title to the subject parcel, the MSB must follow through with the requirements outlined in section **VII. Stipulations**. The conveyance will not be completed until all of the stipulations have been satisfied, and the case file can be administratively closed if the MSB decides to pursue a different location for the public drinking water facility.

V. Traditional Use Finding

In accordance with AS 38.05.830 Land Disposal in the Unorganized Borough, a Traditional Use Finding is required for project areas within the Unorganized Borough. The subject parcel is located within an organized borough; therefore, no Traditional Use Finding is required.

Additional information regarding traditional uses was received during the public notice period. See section **IV. Comments Received** for this information and the DNR DMLW LCS responses.

VI. Modifications to Decision

The recommended action has not been modified from the original proposed actions described in the PD.

VII. Stipulations

The applicant will be required to comply with the following stipulations to complete the proposed land sale:

1. The subject parcel must maintain a public purpose.
2. Once a Final Finding and Decision is signed and the reconsideration period is over without a request for reconsideration received, or once request for reconsideration is resolved, a notice to proceed to survey will be issued. Within two years from the date of the notice to proceed to survey, the applicant must hire a surveyor, and the surveyor must apply to the DMLW Survey Section for Survey Instructions. Within two years after issuance of the Survey Instructions, the applicant must submit a completed record of survey to DMLW's Survey Section for review. The applicant's record of survey must be approved by DMLW and the MSB platting authority, as set forth in the Survey Instructions. Survey costs shall be borne by the applicant.
3. Upon approval of the record of survey by DMLW, a notice to proceed to purchase will be issued to the applicant. Within the time period specified in the notice, the applicant must submit the following to LCS:
 - A completed and signed Declaration of Intent Form; and

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 8 of 10

- Patent application and recordation fees. Fees are established under 11 AAC 05.100 Land Disposals and 11 AAC 05.200 Recorder's Office and are subject to change. Some fees have been reduced by Director's Order Number 3.
- 4. Prior to the completion of the purchase and issuance of a state conveyance document, the applicant must remain in good standing with respect to all terms of the Contract for the Sale of Real Property throughout its term, if such a Contract is issued. The applicant must also remain in compliance with all applicable state and local ordinances and regulations. Failure to do so may result in termination of the Contract for the Sale of Real Property.

If extenuating circumstances delay any of the stipulations listed above, the applicant is responsible for notifying LCS and receiving approval from LCS for the delay with new timeframes for completion to be given. Failure to do this could result in the closure of the purchase application. The purchase cannot be completed until all the above stipulations have been satisfied.

Restrictions and Reservations

Conveyance document will be issued subject to the following restrictions and reservations:

1. Valid existing rights, including reservations, easements, and exceptions in the U.S. Patent, or other state or federal conveyance, and in acts authorizing the issue thereof; easements, rights-of-way, covenants, conditions, reservations, notes on the plat, and restrictions of record, if any;
2. ADL 232824, a Public Easement for an underground electric line. The line is buried at a depth of 48 inches and runs 15 feet in width and 400 feet in length within Lots 3 and 4, Block 26, U.S. Survey No. 1260;
3. Additional reservations and/or restrictions required through the local platting authority;
4. Reservation of the mineral estate pursuant to Section 6(i) of the Alaska Statehood Act and AS 38.05.125 Reservation; and reservation of reasonably necessary access to the mineral estate in accordance with AS 38.05.130 Damages and Posting of Bond; and
5. AS 38.05.810(g) Public and Charitable Use, states that the commissioner shall retain a reversionary interest on each sale or other disposal granted under AS 38.05810(a) or (e) Public and Charitable Use, unless the reversionary interest is waived. In this case, DNR will retain the reversionary interest for this land sale. The patent will contain a reversionary clause which states that if the subject parcel ceases to be used for a public purpose as described in this decision, ownership of the parcel will revert to the State.

Recommendation and approval of the Final Finding and Decision follow.

Final Finding and Decision

AS 38.05.810(a)(1) Public and Charitable Use – ADL 234738

Page 9 of 10

VIII. Final Finding and Decision

The Land Conveyance Section recommends proceeding with the action as described in the Preliminary Decision. It is in the best interest of the State of Alaska to convey the land to the Matanuska-Susitna Borough subject to the reservations, exceptions, and restrictions, as stated above.

The findings presented above have been reviewed and considered. Public Notice has been accomplished in accordance with AS 38.05.945 Notice, and comments received were considered. The case file has been found to be complete and the requirements of all applicable statutes have been satisfied. The actions are consistent with constitutional and statutory intent for State-owned land and this action is agreed to under relevant authorities.

Reconsideration Provision

An eligible person affected by this decision of the department, and who provided timely written comment or public hearing testimony to the department, may request reconsideration to the DNR Commissioner per AS 44.37.011 and 11 AAC 02. Any request for reconsideration must be received by the Commissioner's Office within twenty (20) calendar days after issuance of the decision under 11 AAC 02.040. The Commissioner may order or deny a request for reconsideration within thirty (30) calendar days after issuance of the decision. If the Commissioner takes no action on a request for reconsideration within thirty (30) days after issuance of the decision, the request for reconsideration is considered denied. The Commissioner's decision on reconsideration, other than a remand decision, is a final administrative order and decision of the department. An eligible person must first request reconsideration to the Commissioner before seeking relief in superior court. The Alaska Court System establishes its own rules for timely appealing final administrative orders and decisions of the department.

Reconsideration may be mailed or hand-delivered to the DNR Commissioner's Office, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska, 99501; or faxed to (907)-269-8918 or sent by electronic mail to dnr.appeals@alaska.gov. Reconsideration must be accompanied by the fee established in 11 AAC 05.160(d)(1)(F), which has been set at \$200 under the provisions of 11 AAC 05.160(a)-(b). A copy of 11 AAC 02 is available on the department's website at <https://dnr.alaska.gov/mlw/pdf/DNR-11-AAC-02.pdf>.

PRELIMINARY DECISION
ADL 234738

Proposed Noncompetitive Conveyance to Public and Charitable Applicant
AS 38.05.035(e), AS 38.05.810(a)(1)

RELATED ACTIONS

Proposed Mineral Order (Closing) - AS 38.05.185 and AS 38.05.300

PUBLIC COMMENT PERIOD ENDS 4:30 P.M., WEDNESDAY, MAY 27, 2026

I. Proposed Actions

Preliminary Decision: Approval of Noncompetitive Public and Charitable Use Conveyance ADL 234738

Attachment A: Vicinity Map

Attachment B: Public Notice

*Public is also invited to comment on the proposed related actions:
Draft Mineral Order (Closing) MO No. 1335*

Primary Proposed Action, Noncompetitive Conveyance: The State of Alaska (State), Department of Natural Resources (DNR), Division of Mining, Land and Water (DMLW), Land Conveyance Section (LCS), has received an application from Matanuska-Susitna Borough requesting conveyance of a parcel of state-owned land pursuant to Alaska Statute (AS) 38.05.810(a)(1) Public and Charitable Use. The proposed decision will allow the parcel to be sold to the applicant through a noncompetitive conveyance. The subject parcel is located within DNR's Southcentral Region, in Talkeetna, within the Matanuska-Susitna Borough. The legal description for the parcel is Lots 3 and 4, Block 26, U.S. Survey No. 1260, Talkeetna Townsite, according to the plat approved by the United States Department of the Interior, General Land Office in Washington D.C., on August 22, 1919, containing 1.42 acres, more or less. See *Attachment A: Vicinity Map* for a depiction of the subject parcel.

Proposed Related Action: This related action will be developed separately; however, public notice is being conducted concurrently.

Mineral Order (Closing): DNR proposes to close the subject parcel to new mineral entry. There are no current mining claims located within the subject parcel. Refer to **Section VIII. Planning, Classification, and Mineral Orders** for more information on this proposed related action.

This related action will be developed separately. However, approval of the proposed actions is dependent upon one another in that one action will not proceed without the approval of all actions.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 2 of 14

Public Notice of Proposal: In accordance with AS 38.05.945 Notice, during a period of at least 30 consecutive days, the public will have the opportunity to submit written comments on this proposal. Public notice for all actions is conducted concurrently and will include the Preliminary Decision (PD) for the noncompetitive conveyance (ADL 234738) and draft Mineral Order (Closing) No. 1335.

See **Section XVI. Submittal of Public Comments** and *Attachment B*: Public Notice for details on how to submit a comment for consideration. If, after consideration of timely, written comments, LCS moves forward with the proposal, a Final Finding and Decision (FFD) will be issued.

II. Authority

DNR has the authority under AS 38.05.810(a)(1) Public and Charitable Use, to sell or dispose of state land to a state or federal agency or political subdivision for less than the appraised value as determined by the director and approved by the commissioner to be fair and proper and in the best interests of the public, with due consideration given to the nature of the public service or function rendered by the applicant, and of the terms of the grant under which the land was acquired by the State. AS 38.05.810(a) Public and Charitable Use states, "The commissioner shall ensure, by regulation, deed restriction, covenant, or otherwise, that disposals of land under this subsection serve a public purpose and are in the public interest."

AS 38.05.810(g) Public and Charitable Use states, "The commissioner shall retain a reversionary interest on each sale or other disposal granted under (a) or (e) of this section. The commissioner may waive the reversionary interest on a written determination that the waiver is in the public interest."

AS 38.05.035(e) Powers and Duties of the Director, gives DNR the authority to sell state land if, on preparation and issuance of a written finding, it is determined to be in the best interest of the State. Article VIII, Section 1, of the Alaska Constitution states, "It is the policy of the state to encourage settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest." The authority to execute this decision has been redelegated to the Section Chief of the DMLW Land Conveyance Section.

For the related action, AS 38.05.300 Classification of Land and AS 38.05.185 Generally, allow for mineral orders.

III. Administrative Record

The case file for Alaska Division of Lands (ADL) 234738 constitutes the administrative record for this proposed action. Also incorporated by reference are:

- Susitna Matanuska Area Plan (SMAP, adopted August 2011) and associated land classification files;
- DNR case files: ADL 232824, ADL 232895, ADL 232896, LAS 27952, GS 83, and TWUA A2024-120;
- Federal patent 50-95-0164;
- Matanuska-Susitna Borough Comprehensive Plan – 2005 Update; and
- Talkeetna Comprehensive Plan adopted January 1998, amended March 1999.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 3 of 14

Also incorporated by reference are additional files and documents listed throughout this decision.

IV. Scope of the Proposal

The scope of this proposal, under the statutes described in the preceding **Section II. Authority**, is limited and specific to the following: (1) if the applicant and subject parcel themselves qualify for a Public and Charitable conveyance, (2) if it is in the State's best interest to convey the subject parcel, (3) if it is in the State's best interest to convey the subject parcel to the applicant, and (4) if it is in the state's best interest to waive the reversionary clause. The scope of this decision does not include the control of post-patent use and LCS does not intend to impose deed restrictions for this purpose. Restrictions regarding land use will be handled by the local zoning authority, if any.

The proposed related action will be issued concurrently with the FFD. This action is described in more detail in **Section VIII. Planning, Classification, and Mineral Orders**.

V. Description

- a. Location: The subject parcel is located within DNR's Southcentral Region, in Talkeetna within the Matanuska-Susitna Borough, within Section 24, Township 26 North, Range 5 West, Seward Meridian. See Attachment A: Vicinity Map for additional information.

USGS Map Coverage: Talkeetna B-1

Platting Authority: Matanuska-Susitna Borough

Regional Corporation: Cook Inlet Region, Inc.

Village Corporation: Gold Creek-Susitna Native Association, Inc.

Federally Recognized Tribes: None

- b. Legal Description:
Lots 3 and 4, Block 26, U.S. Survey No. 1260, Talkeetna Townsite, according to the plat approved by the United States Department of the Interior, General Land Office in Washington D.C., on August 22, 1919, containing 1.42 acres, more or less.

The legal description of the proposed mineral order is the same as the subject parcel. The subject parcel will require a record of survey prior to conveyance. See **Section XIII. Survey** for additional information.

VI. Title

Title Report No. 24139, current as of March 17, 2026, indicates that the State of Alaska holds fee title to the land and mineral estate under federal patent number 50-95-0164, dated April 14, 1995. The applicable State case file is General Grant (GS) 83. The parcel is subject to the reservations, easements, and exceptions contained in the federal patent.

State Reservation of Title:

Retention of and Access to Mineral Estate: In accordance with Section 6(i) of the Alaska Statehood Act and AS 38.05.125 Reservation, the State retains ownership of all oil, gas, coal, ore, minerals, fissionable material, geothermal resources, and fossils that may be

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 4 of 14

in or upon the land that it sells. This retention is for all minerals, including both locatable minerals (such as gold, copper, silver, etc.) and leasable minerals (such as oil, gas, coal, etc.)

The State and its successors reserve the right to enter onto the land for the purposes of exploring for, developing, and producing these reserved mineral resources. Access reserved to these retained interests is superior to any and all land uses. The State may also lease these retained interests to mineral developers or allow mining locations to be staked. However, AS 38.05.130 Damages and Posting of Bond also provides that the surface owner will be compensated for damages resulting from mineral exploration and development. For more information, see **Section VIII. Planning, Classification, and Mineral Orders.**

Navigable Waters: Per AS 38.05.126(b) Navigable and Public Waters, "...the state has full power and control of all of the navigable or public water of the state, both meandered and not meandered, and the state holds and controls all navigable or public water in trust for the use of the people of the state." This trust is in accordance with the principles of the Public Trust Doctrine, which are included in Article VIII, Section 14 of the Constitution of the State of Alaska and protected in the United States Constitution. It is vested in the title to this land, is not transferable, and the State's title to submerged lands under navigable waters cannot be relinquished by a transfer of the property. In holding with this concept, navigability determinations are made, and access will be reserved per AS 38.05.127 Access to and Along Public and Navigable Water. For more information, see **Section X. Access, Including Access to and Along Public and Navigable Water.**

DNR has not identified any public, navigable, or anadromous water bodies within the subject parcel. If any such water bodies are discovered, the parcel will be subject to access reservations in accordance with AS 38.05.127 Access to Navigable or Public Water.

Native Interest: The subject parcel is within the boundaries of Cook Inlet Region, Inc. regional corporation. There are no known Native interests identified within this parcel.

Other Conflicts or Pending Third-Party Interest: There are no known conflicts or pending interests. If conflicts or third-party interests are discovered during the public notice period, they will be addressed in the FFD.

VII. Background and Discussion

Background

The State selected the subject parcel under selection file General Grant (GS) 83 and received title on April 14, 1995, through Patent 50-95-0164. On July 21, 2017, DNR DMLW granted an indefinite term public easement, serialized at ADL 232824, within the subject parcel to Matanuska Electric Association, Inc. The easement authorizes construction, operation, and maintenance of an underground electric line 15-feet in width and 400-feet in length. On May 3, 2017, DNR DMLW opened two competitive land sale project files, serialized as ADL 232895 and 232896, to pursue disposal of the subject parcel as two individual lots. Decisions were not issued and these files were closed on August 15, 2018, because the land classification in the SMAP prohibits competitive sale that is not for public purposes. On July 18, 2025, LCS received

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 5 of 14

a complete application from MSB for conveyance of the subject parcel under AS 38.05.810(a)(1), which was serialized as ADL 234738. The MSB has a water right application, serialized as LAS 27952, and a Temporary Water Use Authorization, serialized as TWUA A2024-120 for the new well and public water system. The DMLW Water Resources Section will require updated information to start the amendment for TWUA A2024-120 and the final adjudication of the water right once this conveyance is finalized.

The subject parcel is located within the community of Talkeetna, across the railroad tracks from the main economic center. Access to the subject parcel is via East Front Street, an unpaved public road. The subject parcel is surrounded by low density residential development and short-term rentals, with a campground and boat launch facility operated on Federally owned land across the road. The topography of the subject parcel is mostly flat, with a gentle slope away from the road. Vegetation consists of birch, spruce, and other deciduous and coniferous trees, as well as ferns and low brush. Several trails exist throughout the parcel as documented during an August 2025 field inspection. There are no other known current uses of the subject parcel.

Discussion

The MSB has requested that this conveyance application be considered under AS 38.05.810(a)(1). The Talkeetna Sewer & Water System, the only utility owned by the MSB, was built in 1988 after significant flooding of the Talkeetna and Susitna Rivers damaged personal wells and septic systems in Talkeetna proper. There were also concerns over possible groundwater contamination as wells and septic systems became more densely concentrated with population growth. The Talkeetna Sewer & Water System includes water treatment, water distribution, wastewater collection, and wastewater treatment. The current source wells are located on Alaska Railroad Corporation reserve land under a contract agreement that permits the land use.

The Talkeetna Comprehensive Plan (adopted January 1998, amended March 1999) recommends that a relocation site be reserved for the source wells. The Matanuska-Susitna Borough Comprehensive Plan (2005 update) includes a goal to develop efficient and effective public facilities to meet the needs of the Borough's diverse communities, economy, and growing population by considering expansion of public water and sewer infrastructure where appropriate based on population trends and anticipated population density. The recommendation and goal from both plans are accomplished with the construction and operation of a new public drinking water facility on the subject parcel. The proposed improvements include a storage tank, a new well, pumps, and treatment building on the subject parcel. Adequate water storage and a new raw water source will ensure the community's ability to effectively provide safe, cost-effective, drinking water and fire protection services to residents and summer visitors. Operation of the new facility is dependent on the amendment of the DMLW Temporary Water Use Authorization and issuance of the water right.

Under AS 29.65 General Grant Land, the MSB is entitled to receive 355,210 acres of state-owned land as a municipal entitlement grant. MSB has completed its land selections under the Municipal Entitlement Act, and is therefore requesting conveyance of the subject parcel under AS 38.05.810(a)(1). Pursuant to AS 29.65.100(c) and AS 38.05.810(a)(1), the MSB is eligible for a land conveyance for less than the appraised value as determined by the director and approved by the commissioner to be fair and proper and in the best interests of the public, with due consideration given to the nature of the public services or function rendered by the applicant, and of the terms of the grant under which the land was acquired by the state. The

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 6 of 14

commissioner shall ensure, by regulation, deed restriction, covenant, or otherwise, that disposals of land under AS 38.05.810(a) serve a public purpose and are in the public interest. Conveyance of the subject parcel to the MSB provides an opportunity to improve the public drinking water system for residents and visitors. LCS considered the MSB's conveyance request according to the criteria set forth in statute and determined that it is appropriate for a public and charitable use conveyance at no cost.

AS 38.05.810(g) Public and Charitable states that the commissioner shall retain a reversionary interest on each sale or other disposal granted under AS 38.05.810(a) or (e) Public or Charitable Use unless the reversionary interest is waived.

VIII. Planning, Classification, and Mineral Orders

Planning

The subject parcel is located within the Susitna Matanuska Area Plan (SMAP, adopted August 2011), South Parks Highway Region, Management Unit S-22. The plan designates the subject parcel as Public Facilities - Retain which converts to a classification of Reserved Use Land (pg. 3-34). Pursuant to 11 AAC 55.170, land classified Reserved Use Land is reserved for the transfer to another governmental or non-governmental agency that is performing a public service.

The management summary for the South Parks Highway Region states that numerous parcels of state land that exist at or near the Talkeetna Townsite, most of which are of small size and designated Public Facilities - Retain, are to be retained in public ownership and used for public purposes, if required (pg. 3-27). The management intent for Unit S-22 states "Retain in state ownership unless required for public purposes". This management intent allows for the Public and Charitable sale to a "state or federal agency or political subdivision" under AS 38.05.810 provided the intended use is for public purposes. The MSB plans to use the subject parcel to develop a public drinking water facility. This use is consistent with the direction and guidelines of the SMAP that allow conveyance out of state ownership.

Mineral Order

DNR proposes to close the subject parcel to new mineral entry in accordance with AS 38.05.185 Generally and AS 38.05.300 Classification of Land. There are no current mining claims located within the subject parcel. Closing the parcel to new mineral entry is consistent with the management intent of the SMAP, and minimizes the potential for conflict between the land estate and mineral estate users. If approved by the Commissioner, Mineral Order No. 1335 will close the subject parcel to new mineral entry. If the Department approves the public and charitable conveyance, the mineral order will accompany the FFD. The approval of the mineral order is a separate action occurring concurrently with the FFD.

Mineral orders which close an area to mineral entry, close the area to new exploration and development of locatable minerals such as gold, copper, platinum, etc. Such mineral orders do not apply to leasable minerals (such as oil, gas, coal, etc.), or exploration licensing for such, nor do they preclude reasonable surface access to these resources. However, AS 38.05.130 Damages and Posting of Bond stipulates that the land estate owner will be compensated for damages resulting from mineral exploration and development.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 7 of 14

Local Planning

The subject parcel is within the Matanuska-Susitna Borough but is not within a zoned area or designated Special Land Use District. The Talkeetna Comprehensive Plan (adopted January 1998, amended March 1999) recommends that a relocation site be reserved for the source wells. The Matanuska-Susitna Borough Comprehensive Plan (2005 update) includes a goal to develop efficient and effective public facilities to meet the needs of the Borough's diverse communities, economy, and growing population by considering expansion of public water and sewer infrastructure where appropriate based on population trends and anticipated population density.

Flood Risk

This parcel is in Zone AE as determined by the FEMA Flood Insurance Rate Map panel 2803E, effective March 17, 2011. Zone AE indicates that base flood elevations have been determined and the parcel is subject to inundation by the 1% annual chance flood. The subject parcel is also included within the 100-year Flood Zone on the MSB flood maps.

IX. Traditional Use Findings

The subject parcel is located within the Matanuska-Susitna Borough and a traditional use finding is therefore not required per AS 38.05.830 Land Disposal in the Unorganized Borough. However, information on current or traditional use is welcomed and can be given during the public comment period. If this proposal is approved, LCS will address the information received in a subsequent FFD, if one is issued. See the **Section XVI. Submittal of Public Comments** and *Attachment B: Public Notice* for details on how to submit comment.

X. Access, Including Access To and Along Public and Navigable Water

Public Access

Physical and legal access is via East Front Street, a public right-of-way. The subject parcel is within the Greater Talkeetna Road Service Area.

Access Along Navigable and Public Waters

In accordance with AS 38.05.127 Access to Navigable or Public Water, DNR will determine if a water body is navigable or public and establish easements or rights-of-way as necessary to ensure unobstructed access to and along the body of water. Regulations dictating the creation of easements or rights-of-way under this statute include 11 AAC 51.035 Determination of Navigable or Public Water, 11 AAC 51.045 Easements To and Along Navigable and Public Water, and 11 AAC 53.450 Buffer strips, reserved areas, and public easements.

DNR has not identified any public, navigable, or anadromous water bodies within the subject parcel. If any such water bodies are discovered, the parcel will be subject to access reservations in accordance with AS 38.05.127 Access to Navigable or Public Water.

Easements and Setbacks

- ADL 232824, a Public Easement for an underground electric line. The line is buried at a depth of 48 inches and runs 15 feet in width and 400 feet in length within Lots 3 and 4, Block 26, U.S. Survey No. 1260; and
- Additional reservations and/or restrictions required through the local platting authority.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 8 of 14

Where appropriate, reservations and restrictions will be depicted on the plat and described in plat notes.

XI. Reservation of Mineral Estate

In accordance with section 6(i) of the Alaska Statehood Act and AS 38.05.125 Reservation, the state, in this decision, reserves unto itself the mineral estate, including oil and gas, and the rights expressed in the reservation clause of the statute, that being the right to reasonable access to the surface for purposes of exploring for, developing and producing the reserved mineral resources. Exploration and development, if any, which could occur, would be consistent with AS 38.05.130 Damages and Posting of Bond and other applicable statutes and regulations.

XII. Hazardous Materials and Potential Contaminants

There is no known contamination of, or hazardous materials on, the subject parcel. The applicant is expected to inspect the subject parcel to ascertain the quality and condition of the land. The State makes no representations and no warranties, expressed or implied, concerning the existence or absence of any hazardous substances, hazardous wastes, contaminants, or pollutants on the land proposed for conveyance to the applicant. The State does not assume any liability for the removal of hazardous wastes, contaminants, or pollutants, nor for the remediation of the site should such substances ever be identified.

XIII. Survey

Preliminary Survey Determination #20265002 dated February 3, 2026, from the DMLW Survey Section determined that the subject parcel is unsurveyed. The constituent parts of the parcel do not meet the state's survey criterion for conveyance as a group or individually. Completion of a record of survey at the expense of the MSB will be sufficient to satisfy state survey criteria. This record of survey requires platting authority approval from the MSB.

LCS will issue a notice to proceed to survey if no requests for reconsideration are received, or when requests for reconsideration are resolved, after issuance of an FFD. The MSB must hire a surveyor, and the surveyor must apply to DMLW's Survey Section for Survey Instructions. After issuance of the Survey Instructions, the MSB must submit a completed record of survey to DMLW's Survey Section for review. The record of survey must be approved by DMLW and the MSB platting authority as set forth in the Survey Instructions.

XIV. Compensation and Appraisal

Pursuant to AS 38.05.810(a)(1) Public and Charitable Use, DNR may convey land to a state or federal agency or political subdivision, for less than the appraised value as determined by the director and approved by the commissioner to be fair and proper and in the best interests of the public, with due consideration given to the nature of the public services or function rendered by the applicant, and of the terms of the grant under which the land was acquired by the State.

LCS has evaluated the MSB's proposed project and has determined that it is consistent with the intent of AS 38.05.810(a)(1) Public and Charitable Use. Selling the parcel for less than the appraised value is in the best interests of the public. If the conveyance is approved, the subject parcel will be sold at no cost pursuant to AS 38.05.810(a)(1) Public and Charitable Use. See section **VII. Background and Discussion** for more information on the public purpose. No appraisal is necessary for the conveyance.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 9 of 14

XV. DMLW and Agency Review

Information and comments received from multiple sections within DMLW prior to and during agency review have been considered and included in the preparation of this PD. The conveyance application documents were distributed to State agencies for review from January 23, 2026, to February 24, 2026. The intent of an agency review is to request comments from agencies that may be affected by a conveyance decision. Agencies are given the opportunity to evaluate and comment on MSB's land request to determine if the State should retain all or a portion of the subject lands, and if so, provide supporting reasons for the requested action. Additionally, agencies are requested to identify any stipulations that may be appropriate if the land is to be conveyed out of state ownership. Timely comments received during the Public Notice period will also be considered and addressed in a subsequent FFD, if one is issued.

DNR DMLW LCS received brief comments of non-objection from the following agencies: Department of Transportation and Public Facilities (DOT&PF), DNR Division of Parks and Outdoor Recreation, and DNR Division of Oil and Gas.

DNR DMLW LCS Response: LCS appreciates your review of the application materials for the subject parcel.

Alaska Department of Environmental Conservation (DEC), Contaminated Sites Program: There are five documented contaminated sites in "Cleanup Complete" status near the subject parcel. It is unlikely that these sites will impact the proposed project. If contamination is encountered, please halt operations and contact Alaska Department of Environmental Conservation Contaminated Sites Program.

DNR DMLW LCS Response: LCS appreciates your review of the proposed noncompetitive conveyance. The MSB may use the DEC Contaminated Sites map to identify the location and attributes of the five documented sites.

Alaska Department of Environmental Conservation (DEC), Drinking Water Program: When the MSB develops a public water system, please ensure that it is in compliance with 18 AAC 80, and in direct communication with Charity Bare, the Drinking Water Program point-of-contact for this region.

DNR DMLW LCS Response: LCS appreciates your review of the proposed noncompetitive conveyance. The scope of this decision does not include the control of post-patent use and LCS does not intend to impose deed restrictions for this purpose. Development of the public water system is beyond the scope of this decision, but MSB will receive this PD with the comment from the DEC Drinking Water Program.

Alaska Department of Fish and Game (ADF&G), Access Defense Program: ADF&G has no objection to the land disposal to the MSB but offered comments stating that development of the area would slightly reduce habitat for local species, but is unlikely to have a population level impact on wildlife. Conserving habitat features like trees, shrubs, and ground cover can help support breeding bird populations while meeting project goals. Information on typical nesting seasons in Alaska is available at <https://www.fws.gov/alaska-bird-nesting-season> and may be useful when considering the timing of vegetation clearing.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 10 of 14

DNR DMLW LCS Response: LCS appreciates your review of the proposed noncompetitive conveyance. The MSB will receive this PD with the comment from ADF&G.

Alaska Department of Natural Resources, Division of Geological & Geophysical Surveys:
The Division of Geological & Geophysical Surveys (DGGS) has no objection to this conveyance. However, DGGS shared geological and geophysical information about the site that will be provided to the MSB.

DNR DMLW LCS Response: LCS appreciates your review of the proposed noncompetitive conveyance. The MSB will receive this PD with the comment from DGGS.

The following agencies or groups were included in the agency review, but no comment was received:

- Alaska DNR State Historic Preservation Office, DNR Division of Forestry and Fire Protection, Alaska Department of Commerce, Community, & Economic Development, Division of Community and Regional Affairs, Alaska Mental Health Trust Land Office, and Alaska Soil and Water Conservation District, Upper Susitna Soil and Water Conservation District, and U.S. Fish and Wildlife Service.

XVI. Submittal of Public Comments

See *Attachment B: Public Notice for specific dates and conditions.*

Pursuant to AS 38.05.945 Notice, LCS is issuing public notice inviting comment on this preliminary decision and draft mineral order.

In accordance with AS 38.05.946(a) Hearings, a municipality or corporation entitled to receive notice under AS 38.05.945(c) Notice may hold a hearing within 30 days after receipt of the notice. If a hearing is held, the Commissioner (or representative) shall attend the hearing. The Commissioner has discretion whether or not to hold a public hearing.

LCS will consider all timely, written comments received. If analysis of such comments indicates the need for significant changes to the PD or draft mineral order, additional public notice for the affected lands will be given. Making minor changes to any of the proposals will not be considered significant changes requiring additional public notice.

If the proposals are approved and no significant change is required, the PD and draft mineral order, including any deletions, minor changes, and a summary of comments and LCS responses, will be issued as a subsequent FFD and Mineral Order No. 1335 without further notice. The related action will be developed separately. However, approval of any action is dependent upon one another. One action will not proceed without approval of all actions.

Only persons from whom LCS receives timely, written comment during the identified comment period will be eligible to file a request for reconsideration of the FFD and Mineral Order No. 1335. Upon approval and issuance of these actions, a copy of the decision and order will be

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 11 of 14

made available online at <http://landsales.alaska.gov/> and sent with an explanation of the request for reconsideration process to any party who provides timely written comment.

DNR is prepared to accommodate individuals with disabilities by providing auxiliary aids, services, or special modifications in order to participate in this review. Individuals who may need such assistance should contact DNR's Public Information Center. For more information refer to *Attachment B: Public Notice*.

DEADLINE TO SUBMIT WRITTEN COMMENT IS 4:30 P.M., WEDNESDAY, MAY 27, 2026

XVII. Stipulations

The MSB will be required to comply with the following stipulations to complete the proposed land conveyance:

A. Conditions

1. A notice to proceed to survey will be issued if no requests for reconsideration are received, or when requests for reconsideration are resolved, after issuance of a Final Finding. The applicant must hire a surveyor, and the surveyor must apply to the DMLW Survey Section for Survey Instructions. Within two years after issuance of the Survey Instructions, the applicant must submit a completed survey to DMLW's Survey Section for review. The applicant's surveyor must be approved by DMLW and the local platting jurisdiction, as set forth in the Survey Instructions. Survey costs shall be borne by the applicant.
2. Upon approval and recording of the survey, a notice to proceed to purchase will be issued to the applicant. Within the time period specified in this notice, the applicant must submit the following to LCS:
 - A completed and signed Declaration of Intent Form; and
 - Patent application and recordation fees. Fees are established under 11 AAC 05.100 Land Disposals and 11 AAC 05.200 Recorder's Office and are subject to change. Some fees have been reduced by Director's Order Number 3.
3. Prior to the completion of the conveyance and issuance of a state conveyance document, the applicant must remain in good standing with respect to all terms of the Contract for the Sale of Real Property throughout its term, if such a Contract is issued. The applicant must also remain in compliance with all applicable state and local ordinances and regulations, including all applicable taxes. Failure to do so may result in termination of the Contract for the Sale of Real Property, if such a contract is issued.

If extenuating circumstances delay any of the stipulations listed above, the applicant is responsible for notifying LCS and receiving approval from LCS for the delay with new timeframes for completion to be given. Failure to do this could result in the closure of the conveyance application. The conveyance cannot be completed until all the above stipulations have been satisfied.

B. Restrictions and Reservations

Conveyance document will be issued subject to the following restrictions and reservations:

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 12 of 14

1. Valid existing rights, including reservations, easements, and exceptions in the U.S. Patent, or other state or federal conveyance, and in acts authorizing the issue thereof; easements, rights-of-way, covenants, conditions, reservations, notes on the plat, and restrictions of record, if any.
2. Reservation of the mineral estate pursuant to Section 6(i) of the Alaska Statehood Act and AS 38.05.125 Reservation; and reservation of reasonably necessary access to the mineral estate in accordance with AS 38.05.130 Damages and Posting of Bond.
3. AS 38.05.810(g) Public and Charitable Use, states that the commissioner shall retain a reversionary interest on each sale or other disposal granted under AS 38.05.810(a) or (e) Public and Charitable Use, unless the reversionary interest is waived. In this case, DNR will retain the reversionary interest for this land conveyance.
4. ADL 232824, a Public Easement for an underground electric line. The line is buried at a depth of 48 inches and runs 15 feet in width and 400 feet in length within Lots 3 and 4, Block 26, U.S. Survey No. 1260

XVIII. Discussion and Alternatives

The following alternatives were considered:

Alternative 1: Convey

Approve the proposed conveyance of the subject parcel to the MSB as proposed in this decision in accordance with AS 38.05.810(a) Public and Charitable Use.

Alternative 2: Retain

DNR will take no action and retain the subject parcel.

Alternative 1 will allow conveyance of state land to the MSB at no cost to serve a public purpose. This will support the Talkeetna Sewer & Water System and is compatible with area plan management intent. This project allows the MSB to meet a Comprehensive Plan goal of developing efficient and effective public facilities to meet the Borough's communities, economy, and growing population, and aligns with the Talkeetna Comprehensive Plan recommendation of identifying a site for relocating the drinking water system. Therefore, it is in the best interest of the State to convey the parcel as proposed in this decision.

Article VIII, Section 1 of the Alaska Constitution states, "it is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest." Alternative 1 provides a method for DNR to meet the obligations laid out in the Constitution and statute and maximizes public interest. This is the preferred alternative.

The related action is necessary to allow for the offering of the subject parcel. The primary action and related action are dependent upon one another, and if DNR does not approve the primary action, the related action will not be processed.

Under Alternative 2, the Department will take no action and retain the subject parcels. The applicant would be unable to construct a new public drinking water facility. State retention would

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 13 of 14

not further the Borough's values and goals for meeting future community needs. Retaining the subject parcel in state ownership is not in the best interest of the State. This alternative is not preferred.

For the reasons outlined above, Alternative 1 is the preferred alternative.

Recommendation follows.

Preliminary Decision

AS 38.05.810 Public and Charitable - ADL 234738

Page 14 of 14

XIX. Recommendation and Preliminary Decision

This Preliminary Decision for the proposed disposal of state lands and Mineral Order No. 1335 described throughout this document and its attachments are consistent with the overall management intent for state-owned land and consistent with the requirements of AS 38.05.810(a)(1) Public and Charitable Use. Alternative 1 is the preferred alternative because it is the maximum best use of state land and is in the best interest of the public. Alternative 1 will allow MSB to utilize this parcel for the public purpose of providing public utility infrastructure to the local community.

This is a Preliminary Decision, and analysis of subsequent public review may result in changes to the preferred alternative of the proposed disposal of state lands and Mineral Order No. 1335. A Final Finding and Decision will address any significant issues or concerns raised during the public review process. If the applicant is unable to complete the stipulations, DMLW may decide to close this conveyance application.

The Preliminary Decision, described above, as represented by the preferred alternative, has been reviewed and considered. I find that the recommended action may be in the best interest of the State and that it is hereby approved to proceed to public notice.

Attachment B: PUBLIC NOTICE

**Requesting Input for Proposed Noncompetitive Sale to
Preference Right Applicant - ADL 234738
AS 38.05.810**

COMMENT PERIOD ENDS 4:30 PM, WEDNESDAY, MAY 27, 2026

The Alaska Department of Natural Resources (DNR), Division of Mining, Land and Water (DMLW), Land Conveyance Section (LCS) is conducting a public notice for a noncompetitive land conveyance located within DNR's Southcentral region, in Talkeetna. The legal description for the parcel is Lots 3 and 4, Block 26, U.S. Survey No. 1260, Talkeetna Townsite, according to the plat approved by the United States Department of the Interior, General Land Office in Washington D.C., on August 22, 1919, containing 1.42 acres, more or less.

To obtain the Preliminary Decision (PD), related action, or instructions on submitting comment, go to <https://dnr.alaska.gov/mlw/landsales/> or <https://aws.state.ak.us/OnlinePublicNotices/>. For assistance in obtaining the documents by an alternative method, to request auxiliary aids, services, or special accommodations, contact DNR's Public Information Centers on State work days, Monday through Friday, between 8:30 AM and 4:00 PM in Anchorage at (907) 269-8400 or Fairbanks at (907) 451-2705 or the Southeast Land Office in Juneau at (907) 465-3400 or TTY: 711 for Alaska Relay or 1-800-770-8973. Visit <https://dnr.alaska.gov/commis/pic/> for additional contact information. Individuals who require special assistance must request assistance from the Public Information Center in Anchorage no later than 4:00 PM, Wednesday, May 20, 2026.

Pursuant to AS 38.05.945 Notice, the public is invited to submit comments on the Preliminary Decision and Mineral Order for which notice is being conducted concurrently. If commenting on more than one proposed action, separate comments should be submitted for each. **The deadline for public comment is 4:30 PM, WEDNESDAY, MAY 27, 2026.** Only persons from whom DNR DMLW LCS receives timely, written comment during the identified comment period will be eligible to file a request for reconsideration of the Final Finding and Decision (FFD) or related action. Written comment may be received by fax, email, or postal mail. To submit comments or for direct inquiries, contact John King by mail at P.O. Box 111020 Juneau, AK 99811, by fax at (907) 269-8916 or by email at john.king@alaska.gov. If you have questions, call John King at (907) 465-3513.

If no significant change is required, the PD and related action including any minor changes and a summary of comments and responses, will be issued as the FFD without further notice. A copy of the FFD will be sent to any persons who commented timely on the PD or related action.

DNR reserves the right to waive technical defects in this notice.

STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINING, LAND AND WATER

MINERAL ORDER No. 1335

 X Closing Lands to Mineral Entry Opening Lands to Mineral Entry

I. Name of Mineral Order: Proposed Noncompetitive Conveyance to Matanuska-Susitna Borough – ADL 234738

II. Reason for Mineral Order: This Mineral Order is based upon the attached *Commissioner's Administrative Finding*, applicable statutes, and the written justification contained in the following:

- Susitna Matanuska Area Plan (2011); and
- Preliminary Decision, Proposed Noncompetitive Conveyance to Public and Charitable Applicant – ADL 234738, April 23, 2026, and the subsequent Final Finding and Decision for same

III. Authority: AS 38.05.185 Generally and AS 38.05.300 Classification of Land.

IV. Location and Legal Description: Located within DNR's Southcentral Region, within the Matanuska-Susitna Borough, more specifically described as:

Lots 3 and 4, Block 26, U.S. Survey No. 1260, Talkeetna Townsite, according to the plat approved by the United States Department of the Interior, General Land Office in Washington D.C., on August 22, 1919, containing 1.42 acres, more or less.

V. Mineral Order: This order is subject to valid existing rights and is issued under the authority granted by AS 38.05.185 – AS 38.05.275 and AS 38.05.300 to the Alaska Department of Natural Resources. In accordance with AS 38.05.185(a), I find that the best interests of the State of Alaska and its residents are served by the closure of the lands described in this mineral order to entry under mineral location and mining laws of the State of Alaska. The above-described lands are hereby **closed** to entry under the locatable mineral and mining laws of the State of Alaska.

Concur:

STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINING, LAND AND WATER

**ADMINISTRATIVE FINDING
MINERAL ORDER NO. 1335
Closing Lands to Mineral Entry**

**Proposed Noncompetitive Conveyance to Matanuska-Susitna
Borough
ADL 234738**

Pursuant to AS 38.05.035 Powers and Duties of the Director, the State of Alaska, Department of Natural Resources, Division of Mining, Land and Water (DMLW) proposes to issue a Final Finding and Decision to convey State-owned land into borough ownership through a noncompetitive conveyance, ADL 234738. As noted in the Preliminary Decision – Matanuska-Susitna Borough Noncompetitive Sale, issued April 23, 2026, the subject parcel is within Unit S-22 of the Susitna Matanuska Area Plan. In accordance with the area plan, DMLW proposes to close the entire project area to mineral entry. The attached mineral order includes the legal description of the area to be closed to mineral entry.

DMLW requests the mineral estate of approximately 1.42 acres, identified in the attached mineral order, be closed to mineral entry and location in accordance with AS 38.05.300 Classification of Land for land disposal. Mining activity on the subject parcel would be incompatible with the current and proposed land estate use. The land does not contain any known mineral deposits and was not selected for mineral value. There are no mining claims on the land.

Public notice of the comment period for the proposed mineral order was conducted in accordance with AS 38.05.945 Notice. The Department did not receive objections or comments regarding the proposed mineral order from the public or agencies during the comment period.

In accordance with AS 38.05.185(a) Generally and AS 38.05.300 Classification of Land, I find that the best interests of the State of Alaska and its residents are served by the closure of the land to entry under the mineral location and mining laws of the State of Alaska, as described by Mineral Order (Closing) No. 1335.

Approved:

John Crowther, Commissioner
Department of Natural Resources
