

LAKE LOUISE BOAT LAUNCH & PARKING AREA UPGRADE

MATANUSKA-SUSITNA BOROUGH PROJECT FACTS

Project Scope

To construct improvements to an existing single boat launch and the adjacent parking area on Lake Louise.

Benefits

- Concrete boat launch pads extended to deeper water and widened to allow for boats to be launched or loaded two at a time from trailers.
- Dock adds safe access into boats for handicap and elderly and safe tie up for loading/off loading.
- Additional parking lot space increases safety by relocating vehicles out of the highway traffic travel lanes to the new parking area, allows for more users and improves safety in the loading/unloading zone.

Status

Narrow, shallow, old boat launch replaced by wider, deeper new boat launch and opened to the public on August 8, 2019. New dock facilities opened on June 23, 2020. Parking lot expanded and opened with a D-1 surface; vaulted toilet, and three kiosks completed on August 9, 2020.

The final paving and striping of the parking lot will occur near the end of June 2021 to allow for additional permafrost thawing and ground embankment settlement.

Funding

Lake Louise Community: \$25,000
Mat Su Trails & Parks: \$40,000
MSB: \$330,500 for Grant 3:1 match
ADF&G/USFWS Pitman-Robertson Grant: \$646,500.

New Double wide Launch 8/8/2019

New dock 6/23/2020

New parking lot 8/13/2020

Project Costs

Estimated costs for design, construction, & construction management at approximately \$1M.
